

# Nurse Program

Thursday 10 May 2018  
NH Grand Hotel Krasnapolsky, Amsterdam

The scientific program will be in room '**Topaz**'  
Breaks will be in '**Wintertuin**'

08:30 - 08:35 Opening Remarks  
*Nicolette Leyerzapf, LUMC*

*Chairmen: Karin te Plate & Nicolette Leyerzapf*

08:35 - 09:05 Open Abstracts

08:35 - 08:45 Evaluation of delayed admission of patients with large tumours of the extremities in sarcoma centers  
*Saskia Sachsenmaier, University of Tuebingen*

08:45 - 08:55 Improving lower limb function in patients with major muscular loss or denervation following resection of a sarcoma  
*Jennifer Woodhouse, HFRC*

08:55 - 09:05 Is malnutrition associated with postoperative complications in patients with primary bone sarcomas?  
*Santiago A. Lozano-Calderon, Massachusetts General Hospital*

09:05 - 09:35 Food-drug interactions in Medical Oncology  
*Marijn Veerman, Erasmus MC*

Cancer patients frequently use lots of different herbs, food and drinks. Whether this is because they have special needs, change of taste or use alternative medicine on their own initiative, there is always a chance of interacting with standard anti cancer agents. Since this could lead to dangerous (even life threatening) side effects or treatment failure, knowledge about these food-drug interactions is crucial.

09:35 - 10:05 The introduction of protontherapy in the Netherlands  
*Stijn Krol, LUMC / HollandPTC*

In 2018 protontherapy is introduced in the Netherlands. In this presentation potential advantages and pitfalls of this advanced form of radiotherapy will be explained, and several indications will be illustrated.

10:05 - 10:45 Open Abstracts

10:05 - 10:15 Compliance and satisfaction with intensive physiotherapy treatment during chemotherapy in patients with bone tumours and evaluation of related prognostic factors. An observational study.  
*Mattia Morri, Istituto Ortopedica Rizzoli*

10:15 - 10:25 Maximal activity program during childhood cancer treatment  
*W. Peter Bekkering, Princess Maxima Center for Pediatric Oncology*

10:25 - 10:35 Are proprioceptive and balance exercises able to improve motor performance after knee salvage surgery for bone primary tumor? A controlled prospective observational study.  
*Mattia Morri, Istituto Ortopedica Rizzoli*

10:35 - 10:45 The patient perspective on the impact of Tenosynovial Giant Cell Tumors on daily living  
*Monique Mastboom, LUMC*

10:45 - 11:15 Coffee Break

Chairmen: *Peter Bekkering & Renate Arts*

11:15 - 11:35 Open Abstracts

11:15 - 11:25 Invasive treatments in Palliative Care - are they justifiable

*Susanne Berthold, Klinikum Stuttgart / Olgahospital*

*Christine Bodenstein, Klinikum Stuttgart*

11:25 - 11:35 Mentorship for patients treated for sarcoma

*Lotta Vade, Oslo University Hospital / Radium Hospital*

11:35 - 11:55 Adolescents & Young Adults with cancer... WHO CARES...?!

*Rosemarie Jansen, Radboud UMC*

Adolescents & Young Adults (AYA's) have different needs compared to older adults when they are diagnosed with cancer. There are two basic principles essential to good AYA care. Firstly, it is extremely important that healthcare professionals not only recognize an AYA but also admit the special needs they may have. Furthermore, it is important that the care for AYAs is organized in such a way that this special care is available for every AYA in every country.

11:55 - 01.00 Lunch

01.00 - 01.15 Official Opening EMSOS 2018 in the Grand Ballroom

01.15 - 01.45 Campanacci Lecture in the Grand Ballroom

01.45 - 02.15 E-mental health interventions supporting The Needs of Children, Siblings and Parents in Pediatric oncology

*Martha Grootenhuis, Princess Maxima centre Pediatric Oncology*

Chairmen: *Petra Veldman & Lian Doornbos*

02:15 - 02:30 Patient empowerment and patient participation

*Gerard van Oortmerssen, Patientenplatform Sarcomen*

Our time is characterised by extremely fast technological development. Digital technology is empowering patients in various ways: thanks to the Internet patients can be well informed about their disease and possibilities for treatment, and can connect to other patients worldwide to share information and experiences, and to give each other emotional support. Well informed patients can, as individuals, truly participate in shared decision making with their specialist. Collectively, empowered patients can play an important role in improving quality of care, as well as contribute to research by sharing their joint experiential expertise with medical experts. In this presentation two projects will be discussed which clearly demonstrate the power of collective patient action.

02:30 - 03:00 Open Abstracts

02:30 - 02:40 Digital decision aid: a tool to avoid unnecessary surgery in patients diagnosed with atypical cartilage tumor (ACT)

*Petra Veldman, MANP / Radboud UMC*

02:40 - 02:50 Shared Decision Making in children and adolescents undergoing malignant bone cancer surgery.

*W. Peter Bekkering, Princess Maxima Center for Pediatric Oncology*

02:50 - 03:00 Oncological rehabilitation and empowerment in patient care

*Martine Karlsen Odgaard, Oslo University Hospital*

03:00 - 03:30 Coffee Break

03:30 - 04:20 Open Abstracts

03:30 - 03:40 Pelvic surgery in malignant bone tumors; three complicated cases

*Nicolette Leyerzapf, LUMC*

03:40 - 03:50 Self-related quality of life and functional results after hemipelvectomy.

*Israel Perez-Munoz, Ramon y Cajal Hospital Madrid*

03:50 - 04:00 Negative Pressure Wound Therapy for Closed Surgical Wounds in Musculoskeletal Oncology Patients - A Case-Control Trial

*Sanjay Gupta, Glasgow Royal Infirmary*

- 04:00 - 04:10 Negative Pressure Wound Therapy In Lower Limb Amputations - A Case Control Trial  
*Sanjay Gupta, Glasgow Royal Infirmary*
- 04:10 - 04:20 Management of sacrococcygeal Chordoma: Clinical results and review of wound problems  
*Onur Nazim Tan, Ankara University Medical Faculty*

04:20 - 04:45 Poster Presentations

- 04:20 - 04:25 Sexuality, self-worth and resilience 20 years after amputation, rotationplasty and megaprosthesis  
*Carmen Trost, Medical University Vienna*
- 04:25 - 04:30 Patients' perception of changes and consequences after tumor surgery/treatment  
*Carmen Trost, Medical University Vienna*
- 04:30 - 04:35 Limb salvage for very large tumors - Are we justified?  
*Mandip Chandravadan Shah, Sparsh Orthopedic Oncology Clinic*
- 04:35 - 04:40 Phase 1 in developing a sarcoma-specific patient-reported outcome measure in the UK: exploring patient's experiences  
*Ana Martins, University College London Hospitals NHS Foundation*
- 04:40 - 04:45 Enhancement of nurses performance concerning perioperative care to children with osteosarcoma and their families  
*Tanazor Hemdan Abdelhamed Morsi*

04:45 - 05:00 End of Program

- Nicolette Leyerzapf, LUMC*  
*Petra Veldman, MANP / Radboud UMC*
